PROJECTS

Fruitopia

- Created and maintained a website dedicated to exploring the world of strawberries.
- Developed the website using HTML and CSS
- Built responsive and accessible web pages to allow users to quickly browse the site.

Personal Portfolio Website

- Created and maintained an online portfolio to showcase my skills and expertise as a web developer and designer.
- Developed the website using HTML and CSS.
- Received positive feedback from clients and colleagues on the website's professional design and easy-to-use interface.
- Successfully used the website to attract new clients and showcase my work to potential employers.

Beans And Blends

- Designed and developed a website for the coffee company Beans & Blends, showcasing their unique blends and Flavors.
- The website features an easy-to-use interface, attractive design, and seamless navigation to enhance the user experience.
- Technologies used include HTML and CSS.

Multi-tasking Website

- Developed in HTML, CSS and Django.
- Multiple games and functions could be performed by the user on the same website.
